Lt. Colonel John Wagner  
Commanding Officer/Director  
U.S. Army Technical Sciences Center  
Hanover, New Hampshire

Dear Colonel Wagner:

I should like to express my appreciation, somewhat tardily, for your willingness in allowing Mr. Robert Frost to invite me to attend the 4th Meeting of the Navy's Geoenvironmental Technical Advisory Group at the TSC. As Mr. Frost undoubtedly told you, I was representing the interests of both Mr.  and Mr. Arthur Lundahl who have been aware of the nature of the impressive study being undertaken by your Photo Interpretation Research Division in support of the Navy project. STATINTL

The techniques used by Mr. Frost's highly competent group in interpreting and analyzing, largely from aerial photography, of significant environmental conditions applicable to the Navy project were most informative and illustrative of the manner in which well trained interdisciplinary teams can contribute.

Will you please extend my thanks to Mr. Frost and to Dr. Rinker for the time they spent with me in describing their activities. I hope to see Mr. Frost in Washington in the near future.

Sincerely,

STATINTL
